Chatham County Mosquito Control

[Request a Spraying](#)

Chatham County Mosquito Control is responsible for providing a comprehensive, cost effective mosquito abatement program for Chatham County and all of its municipalities. This is accomplished through the implementation and integration of various safe and environmentally sound mosquito control measures to protect all Chatham citizens from pestiferous and medically important mosquitoes.

Chatham County is the most northern coastal county in Georgia, with a land area of approximately 438 square miles. The area includes a variety of aquatic and terrestrial habitats, such as coastal barrier islands, urban landscape, and serene sandhill regions. Many species of mosquitoes are known to occur in the county. Chatham County Mosquito Control has a staff of thirty, including one seasonal position and is fortunate to be an independent county department, reporting directly to the County Manager.

Mosquito Prevention

It is easy to help stop mosquitoes from reproducing and spreading disease. Mosquitoes need standing water to breed. **Keep all containers around your home free from standing water!**

Mosquito prevention images: 1. A white bucket with water. 2. A white bucket with water and a mosquito. 3. A blue bucket with water. 4. A green bucket with water. 5. A purple bucket with water.
